ACCESSIBILITY PLAN

19th October 2015 – 19th October 2018

This Policy of Mulberry House School applies to all sections of the school including the Early Years Foundation Stage.

Mission Statement

We will reach high to be the people we want to be, respect ourselves and others and enjoy each new challenge.

The accessibility policy and plan are drawn up in accordance with the Equality Act 2010.

Definition of Disability

In the Equality Act 2010, a person has a disability if:

- they have a physical or mental impairment
- the impairment has a substantial and long-term adverse effect on their ability to perform normal day-to-day activities

Main Objectives

- To ensure full participation in the school community for pupils, prospective pupils and parents/guardians with a disability.
- Compliance with the Equality Act 2010 is consistent with the school's aims and equal opportunities policy, and the operation of the SEND policy;

The school recognises its duty under the Equality Act 2010

- Not to discriminate against disabled pupils in their admissions and exclusions, and provision of education and associated services.
- Not to treat disabled pupils/families less favourably.
- To promote a school culture of diversity and inclusion.
- To take reasonable steps to avoid putting disabled pupils at a substantial disadvantage.
- To publish an accessibility plan.

The school recognises and values the knowledge of the parents with regard to their child's disability and its effect on his/her ability to carry out usual activities, and respects the right to confidentiality.

The school provides all pupils with a broad and balanced curriculum, differentiated and adjusted to meet the needs of individual pupils and their preferred learning styles. It endorses the key principles in the EYFS and the National Curriculum framework, which underpin the development of a more inclusive curriculum. They are as follows:

- Setting suitable learning challenges
- Responding to pupils' diverse learning needs
- Overcoming potential barriers to learning and assessment for individuals and groups of pupils

Education & Related Activities

The school will seek to follow the advice of specialist teachers, SEN advisers and appropriate health professionals.

Children identified as having special educational needs and/or disabilities will be put on the SEND Register and an Individual Education Plan (IEP) will be drawn up in partnership with the parents. IEPs are reviewed every six to eight weeks.

Only children with the most complex and enduring needs are likely to be eligible for an EHCP (Education Health Care Plan). All other needs are met through the graduated approach of SEN support using the "assess, plan, do, review" cycle.

The school will organise the review meeting for the EHCP short term targets and will co-operate with the LA in the review process.

Physical Environment

The school will take account of the needs of pupils, parents and visitors with physical difficulties and sensory impairments when planning and undertaking future improvements and refurbishments of the site and premises, such as improved access facilities and fittings with a three year accessibility plan.

Provision of Information

The school will make itself aware of local services, including those provided through the Camden Inclusion Team, for providing information and alternative formats when required or requested.

Staff Training

We acknowledge that there is a need for on-going awareness raising and training for staff in the matter of disability, discrimination and promoting inclusion of all children and staff.

Aim 1: To increase the extent to which disabled pupils can participate in the school curriculum.

Aim 3: To improve the delivery of information to disabled pupils and parents.

This will include planning to make written information (that is normally provided by the school to its pupils) available to disabled pupils. Examples might include handouts, textbooks and information about school events. The information should take account of pupils' disabilities and pupils' and parents' preferred formats and be made available within a reasonable timeframe. When planning to make written information available to disabled pupils we need to establish the current level of need and to respond to changes in the range of need. The school will need to identify agencies and sources of such materials to be able to make the provision when required. The school's computing infrastructure will enable us to access a range of support materials.
