**This week  
we are  
learning  
to...**

## Subject: Literacy

In our Phonics lesson this week we will be looking at two new sounds; o and g. By the end of the week, we would like the children to be able to create a list of words that start with o and g and identify them in words. When we are forming our letters please remember to use the rhymes we use at school. Can you think of a creative way to create these letters using natural resources at home. Remember to follow the correct direction and starting point of the letter.

In our News lesson this week we will be focusing on the book 'Blue penguin'. Inspired by our current project on the senses. At home, you might like to carry out an experiment using ice to create a home for your penguin. When building your habitats, get your child to discuss how the ice feels and maybe what happens when it is placed near the radiator.

## Subject: Maths

This week in our Maths lesson we will be focusing on counting objects that are in groups and placing these in order. We will be using different objects to count with, such as counters and small animals. To continue this at home you can sort different coloured fruits together and find the correct number card to match. As an extension, see if they can identify one more or one less.

In our Maths project lesson we will be continuing with symmetrical patterns and using a decorative egg to help us do this. We can create symmetry in different ways, why not try creating a symmetrical pattern using sweets or Lego!

## Subject: Project

This week we will be learning about food categories and the importance of a varied diet. The children will learn to differentiate between healthy foods that give us energy build a strong immune system and bones.

At home you can make your own fruit skewers by choosing all the healthy, nutritious and colour fruit you like.
