

W/C: 20.09.2021

**This week  
we are  
learning  
to...**

**Subject: Maths**

The Squirrels' class will be focusing on identifying circles in the environment. The children will be going on a shape hunt to find as many objects as they can that look like a circle. At home, you can encourage the children to use chalk to create their own circles in the garden or on paper. A great way to do this is by demonstrating large clockwise and anti-clockwise actions, with the chalk.

**Subject: Literacy**

This week the Squirrels' class will be focusing on their fine motor skills through mark making. The children will be using feathers to make different marks. At home you could provide the children with some paint and a variety of natural tools, to dip in the paint and mark on paper. Some great natural tools are sticks, flowers and thick long leaves.

**Subject: Project**

This week in our 'All About Me' project, the Squirrels' class will be focusing on introducing themselves using microphones! The children will be learning to develop their own confidence as well as engaging with the other children by saying their names. Why not share photos of family and friends with your child and see if they can recognise themselves or others by name!
