**This week  
we are  
learning  
to...**

**Subject: Maths**

This week the Squirrels' class will be learning to count objects to 2. At home you can support the children to pair up objects, that you can find around the house that add up to 2. For example, 2 spoons, 2 toy cars or 2 cushions.

**Subject: Literacy**

This week the Squirrels' class will be creatively using tools to make marks in a cornflour mix. At home you can use the end of a paint-brush, spoons or even your fingers to make marks in a small tray or small plate of flour. You could also encourage the children to make straight lines or circles.

**Subject: Project**

In the Squirrels' class this week, the children will be drawing their own self portraits. The children will be using mark making tools to create their drawings. The children will be describing their features and their body parts using key vocabulary such as head, shoulders, knees, toes, ears, nose, eyes and mouth. At home, you can support the children by practising their tripod grip and encouraging them to point to their body parts. A great way to do this is through the rhyme "Head, Shoulders, Knees and Toes".
