

W/C: 22.05.2023

**This week
we are
learning
to...**

Maths

This week, the Hedgehogs' class will be looking at squares and the properties of a square. For example, they have 4 edges and 4 corners. We will be looking in our environment to see what objects are in the shape of a square too. At home, you can support your child's learning by doing a shape hunt looking for squares.

Literacy

This week, the Hedgehogs' class will be looking at trains. We will discuss our own train experiences and what they look like. We will be helping the children to hold a pencil effectively with a tripod grip, to draw a train and look at some details. For example; the wheels are circles, and the carriage is a rectangle. At home, you can encourage your child to practise their writing skills by creating their own train ticket.

Understanding the world

As part of the Hedgehogs' class project on 'Transport', on Tuesday 23rd May 2023, the Hedgehogs class will be holding a 'Road Safety Awareness Day', where the children will be learning about road safety, traffic signs and safe crossing rules. The children will also take part in a range of road safety activities and, participate in a road safety obstacle course. All children are invited to wear bright and reflective clothing on this day.
