

W/C: 12.06.2023

**This week
we are
learning
to...**

Maths:

This week in our Maths lesson, the children will learn to simplify a fraction to its simplest form. At home, provide your child with a variety of fraction sums and encourage them to simplify the fraction to its simplest form. You can even make this into a game and see who completes it the quickest.

Literacy:

This week in our Creative Writing lesson, the children will write an instructional writing on how to look after our physical and mental health. At home, encourage your child to design a poster that states different ways that people can look after themselves.

Science

This week in our Science lesson, the children will understand that climate change is the pattern of weather over many, many years. At home, encourage your child to research the effects of climate change and what we can do to help our planet.

Project

In our Project lesson, the children will recognise toys from around the world. At home, encourage your child to discuss the similarities and differences between toys around the world and theirs.
