This week we are learning to...

Maths

This week the Squirrels' class will be recapping all the shapes, that we have been learning about this term. At home, see how many shapes you can find. Collect some objects that look like a circle, square and triangle. Draw around the objects to reveal the shape.

Literacy

This week the Squirrels' class will be introduced to the terminology of past, present and future. To begin we will discuss what the children did on the weekend. At home, you could discuss with the children what they did at school and what they would like to do tomorrow. Remember to explain the difference between present and future. The children could draw a picture, using a tripod grip of one of their favourite things to do in the holidays.

Project

This week in our 'People who help us' project, the children will be recapping all the different professionals, that they have learnt about. The children will be doing this through stories, role play and small group discussions. At home, you could ask the children to create a thank you card for a profession of their choice.
