

W/C: 09.10.2023

**This week
we are
learning
to...**

Maths

This week, the Hedgehogs' class will be looking at squares. We will be looking at the properties of a square. For example; they have 4 edges and 4 corners. We will be looking in our environment to see what objects are in the shape of a square too. At home, you can support your child's learning by doing a shape hunt looking for squares.

Literacy

This week, the Hedgehogs' class will be looking at trains. We will discuss our own train experiences and what they look like. We will be helping the children to hold a pencil effectively with a tripod grip, to draw a train and look at some details. For example; the wheels are round circle and the carriage is a rectangle. At home, you could encourage your child to practise their writing skills by creating their own train ticket.

Understanding the world

This week, the Hedgehogs' class will take part in 'Road Safety Awareness Day', as part of their project on 'transport'. The children will be learning about road safety, traffic signs and safe crossing rules. The children will also take part in a range of road safety activities, participating in a road safety obstacle course.

At home, you can go over road safety signs with your child, and see if you can spot any of them on your walk to school.
