This week we are learning to...

Maths

This week, the Hedgehogs' class will be learning to recognise numbers from 0-5. At home, you could practise with the children by looking for numbers in your environment. If the children can recognise numbers from 0-3, you can then extend this to 5. You could also try to recognise numbers when walking to school or going to the park.

Literacy

This week, we will be looking at the rhyme 'Incy Wincy Spider'. The children will be encouraged to join in with singing the rhyme as well as doing the actions. We will also explore this across mark making and the children will be supported in making circular marks for the body and horizontal/vertical lines for the legs to create their own spider. We will be paying close attention to their more dominant hand and continue to support pencil control, looking at the tripod grip. At home, encourage your child to create a variety of marks using horizontal, vertical, anti-clockwise and clockwise movements.

Project

This week, the children will be taking part in 'Scoot to School Day'. The children will be practising how to use their scooter and learning about safety equipment. The children will also be talking about safe ways to cross the road. At home, you could practise how to ride the scooter and how discuss how to cross the road safely with an adult.
