**This week
we are
learning
to...**

Maths

This week, the Hedgehogs' Class will be recapping all things Maths! Taking a look back at the numbers we have been focusing on this term, looking at recognition and the quantity of each of those numbers. At home, you can support this by singing number rhymes and supporting the children to use their fingers as a representation of each number.

Literacy

We will be supporting the children with their pencil control and their ability to make meaningful representations on paper. Asking the children questions related to their work is a great way for us to see their creative side. At home, you can start to support them using colour for particular purpose.

Project

As we reach our last week of our pet project, the Hedgehogs' class will be taking on the very important role of the vet. The children will be encourage to participate in role play alongside others showing care and concern for the animals visiting the vets. At home, offer the children the opportunity to participate in role play alongside yourself.
