

W/C: 10.06.2024

**This week
we are
learning
to...**

Maths

This week, in our Maths lesson, the children will learn to simplify a fraction to its simplest form. At home, provide your child with a variety of fraction sums and encourage them to simplify the fraction to its simplest form. You can even make this into a game and see who completes it the quickest.

Literacy

This week, in our Creative Writing lesson, the children will write an instructional writing on how to look after our physical and mental health. At home, encourage your child to design a poster that states different ways that people can look after themselves.

Science

This week, in our Science lesson, the children will classify species into the correct group. At home, encourage your child to do a similar activity where they go out for a minibeast hunt and group them into the correct category according to their characteristics.

Project

In our Project lesson, the children will be able to explain what the Ancient Greeks believed in. At home, encourage your child to research one god or a goddess and explain what powers they had and why they were important to the Ancient Greeks.
