

W/C: 14.10.2024

This week we are learning to...

Literacy

This week in our Creative Writing lesson, the children will continue to explore and use adjectives to enhance their work. They will be transformed to a frozen landscape and will engage all of their senses to write a descriptive piece of text. At home, you can find a picture of a landscape and ask your child to create a defining thinking frame to list as many adjectives to describe the picture as they can. In Phonics, our sound of the week is 'zz' and children are encouraged to complete one of the story books on Reading Eggspress.

Maths

This week in our Maths Project lesson, the children will be familiarising themselves with the months of the year and will practise putting them in the correct order. In Maths Number, the children will be continue learning about number bonds and will be using concrete objects to create different ways of making 10. At home, you can create a number bond model using paper plates.

Science

This week in our Science lesson, the children will understand what the force of gravity is and how it affects our everyday lives. At home, encourage your child to conduct an investigation to explore the speed at which different objects fall when dropped at the same height. Don't forget to record your findings!

Project

This week in our Project lesson, the children will understand how health and hygiene was different in the Victorian era compared to now. At home, encourage your child to draw two images, one of how life was in Victorian era and another one comparing with life now.
