**This week
we are
learning
to...**

Literacy

This week in our Creative Writing lesson, the children will look at rhyming words in poetry. They will learn how to identify and compose rhyming words and will work with the Creative Camel to create their own simple poems. At home, you can encourage your child to look at different poems and to highlight the rhyming words. Please email the poems they read at home and we can find time to perform them in class. In Phonics, the children will refine their understanding of vowels. We encourage all children to complete the assigned task on Reading Eggs as well as choosing their own story to read on Reading Eggspress.

Maths

This week in Maths Number, the children will learn how to use Dienes to represent a number. They will be looking at tens and units and we encourage you to practice parting numbers into tens and units at home. At home, hide different toys around the house and ask your child to verbally describe their location using the correct terminology.

Science

This week in our Science lesson, the children will learn that the pull of a magnet is the magnetic force. The children will have the opportunity to participate on an investigation to explore which materials and objects are magnetic and which are not. At home, you could conduct your own experiment and record your results on a tick sheet.

Project

This week in our Project lesson, the children will learn about how the lives of children during the Victorian era were very different from what we experience today, especially during the Industrial Revolution. Many children, instead of going to school, were forced to work long hours in harsh conditions to help support their families.

The children will also look at the Industrial Revolution as this brought a massive shift in how goods were produced, with factories and machines becoming the centre of production.

At home, encourage your child to recount what they have learnt at school about Victorian era and to create a poster to explain life in this time.
