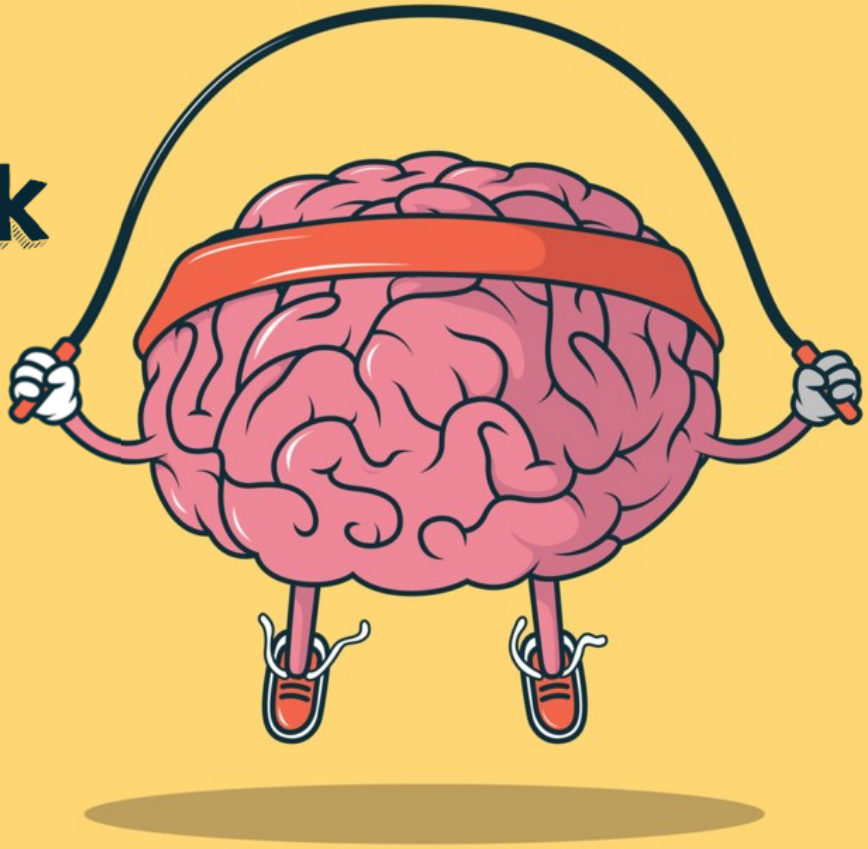
W/C: 03.02.2025

This week we are learning to...



Maths

This week, the Hedgehogs' class will be looking at the number rhyme '5 Little Bees'. This is to encourage the children to count in sequence and use number language during their play. We will also be taking a look at the basic 2D shapes and familiarising themselves with identifying the shape name. At home, you can support your child's counting by also singing number rhymes as well as counting every day objects such as steps.

Literacy

This week, the children will be looking at the story 'Hodge the Hedgehog' by Amy Sparkes. We will be looking for the children to show concentration throughout the story and show the ability to maintain their attention for a short period of time. The children will be encouraged to answer simple questions throughout the story. For example; 'What was falling from the trees?' You can support this at home, by reading stories and getting your child to identify objects on the page.

Understanding The World

This week, we will be looking at different construction materials. The children will be attempting to build a city! This is great for their fine motor skills and for them to begin problem solving. We will also use this as a Maths link to promote the use of mathematical language such as; tall, short, big and small.
