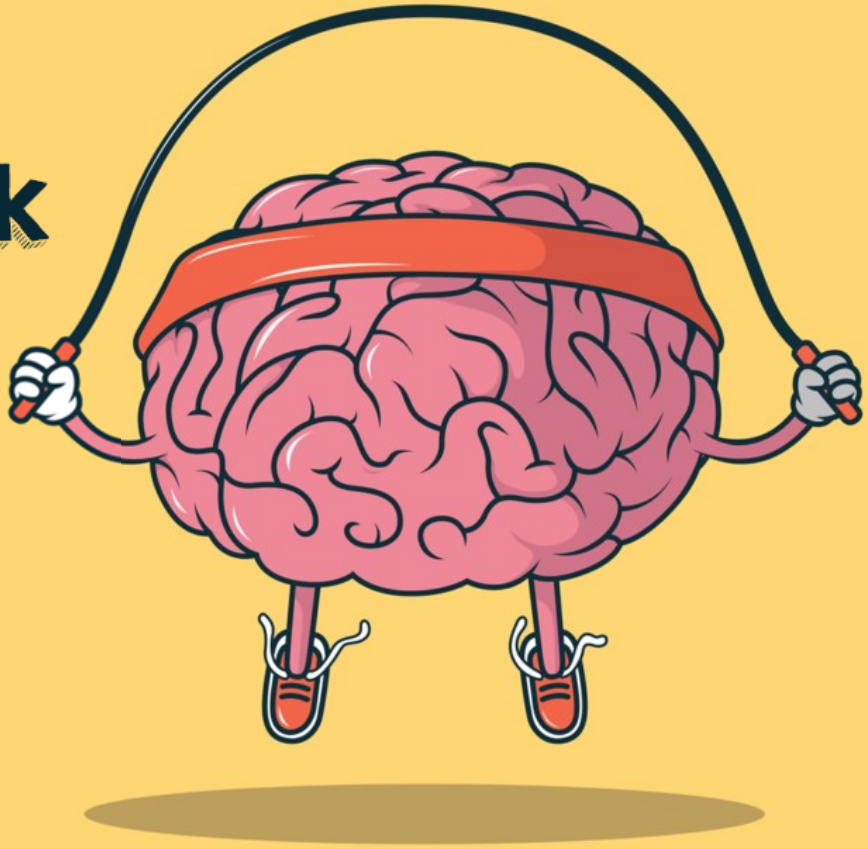
W/C: 13.01.2025

This week we are learning to...



Project

This week, we will be looking for the children to show confidence and independence using resources, as well as acknowledging the other children around them. We will be exploring all the different modes of transport looking at the different ways they move. At home, you could see what transport you see on your way to and from school.

Literacy

The Hedgehogs' class will be introduced to some new and some familiar stories this week, as we familiarise the children with routine and expectations, as well as getting used to sitting together with their peers. We will be exploring the use of songs, alongside the stories, to encourage repetition and use of rhyme, building on their communication and language. You can encourage this at home, by using some of the songs we use at school, such as "How are you today?" using Makaton signs!

Personal, Social and Emotional Development

Every Friday, the children are encouraged to bring something personal to them from home to share with their peers at school. This is to support their personal development as well as their communication and language. At home, you can support your child in choosing something and prompt them with some questions about this. We hope to see progress in this as we go through the term.
