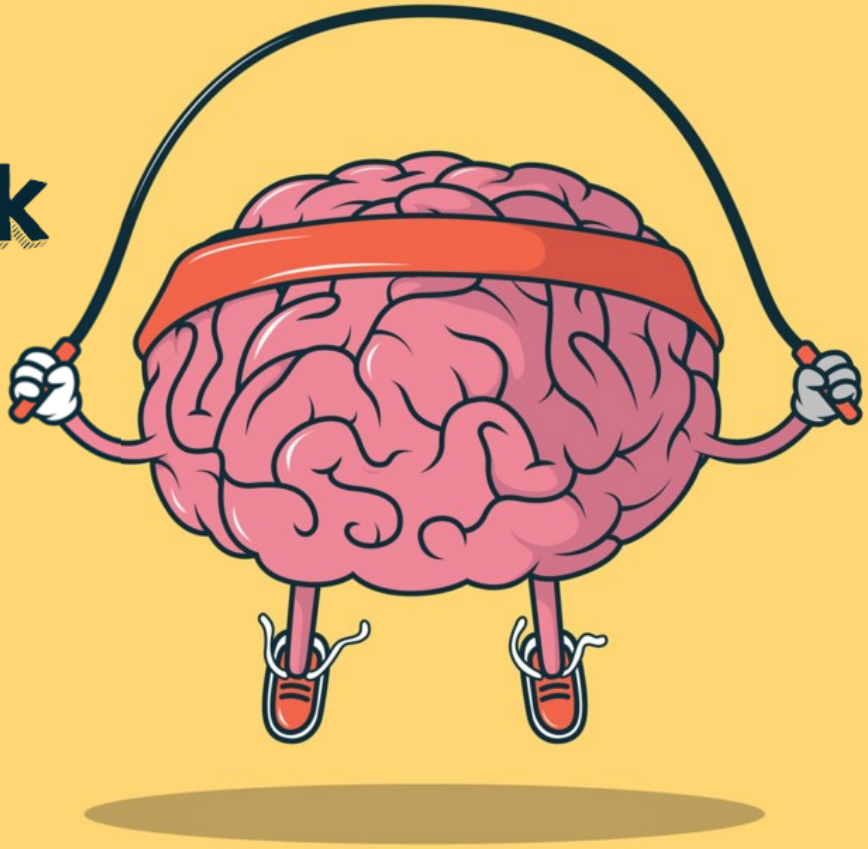
W/C: 24.02.2025

This week we are learning to...



Literacy

This week, the Hedgehogs' class will be looking at forms of technology that we can explore when mark making. Using the light box the children will discover mark making in space and will draw planets in the dark, supporting them in drawing recognisable shapes. We will be paying close attention and supporting the children with their pencil grip. We will also be using a paint app on the iPads to support their ICT skills. If you have electronic devices at home, allow the children to explore a simple drawing app. Using their fingers as a tool to mark make is great for developing their fine motor skills.

Maths

This week, we will being using the children's knowledge to begin to sort objects by shape, size or colour. We will be looking for the children to identify similarities in objects in order to group them together. A simple activity to support this could be separating Duplo blocks into different colours. At home, you could ask your child to sort the blocks by sizes or shape.

Project

This week, the Hedgehogs' class will be role playing a pet photographer. The children will be doing this through role play and small group discussions. At home, you could ask your child to use a camera to take a picture of their favourite pet toy or even their actual pet!
