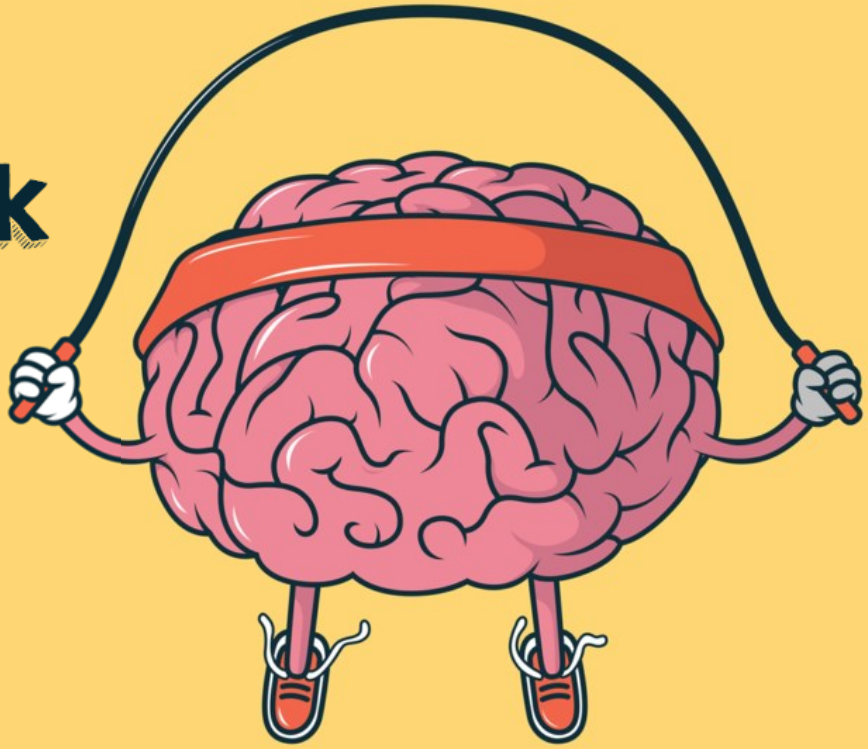
This week we are learning to...



Project

This week, the Hedgehogs' class will be learning about 'Pets'. We will begin our new project looking at aquatic pets and how we care for them and all the things they might need. If you have any pets at home, we would love to display some pictures in our classroom so, if you would like to add to our pet display please send a picture to info@mulberryhouseschool.com

Project

This week, the Hedgehogs' class will be taking on the very important role of the vet. The children will be encourage to participate in role play alongside others showing care and concern for the animals visiting the vet. At home, offer the children the opportunity to participate in role play alongside yourself.

Expressive Arts and Design

This week, the Hedgehogs' class will be looking at the technique of weaving. Using this technique, we will support the children in creating their very own dream catchers. We will encourage the children to weave materials using a pincer grip. At home, you could support this by providing your child with materials that they are able to thread. For example, threading pasta onto a piece of string to create some jewellery.
