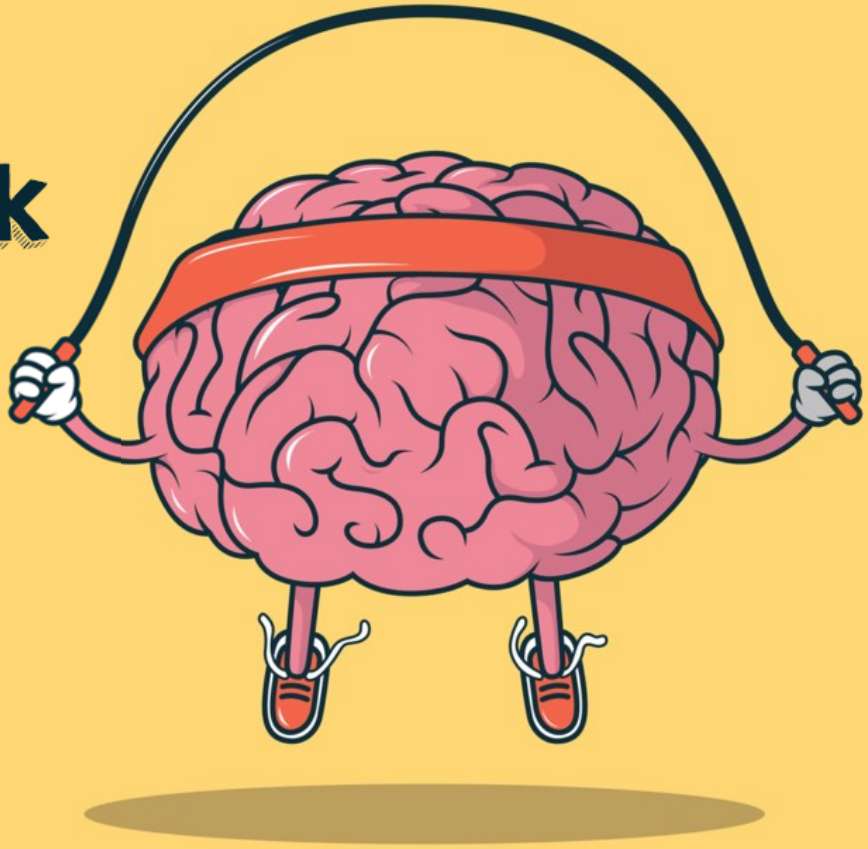
This week we are learning to...



Maths

This week, the Hedgehogs' class will be exploring 2 dimensional shapes. The children will be supported in collecting sticks and arranging them to make simple, familiar shapes, such as a square and a triangle. We will also be going on a shape hunt! Why don't you replicate this at home in your garden? Try to see if your child can find shapes in everyday objects, pointing out things around the house such as a clock. Have fun!

Literacy

Our story of the week is 'What do I look like?' by Nick Sharrat. We will be looking at our similarities and our differences and begin to look at diversity. We will continue focusing on the children's attention by asking basic questions related to the story to see how much the children have retained. To support our story of the week, at home, you can help your child to find their similarities and differences from you!

Understanding The World

This week, we will be looking at different construction materials, and the children will be attempting to build a city! This is great for their fine motor skills and for them to begin problem solving. We will also use this as a Maths link to involve the use of mathematical language such as: tall, short, big and small. At home, why not use Duplo and see how many towers you can build. Line them up and begin to introduce their vocabulary as well.
