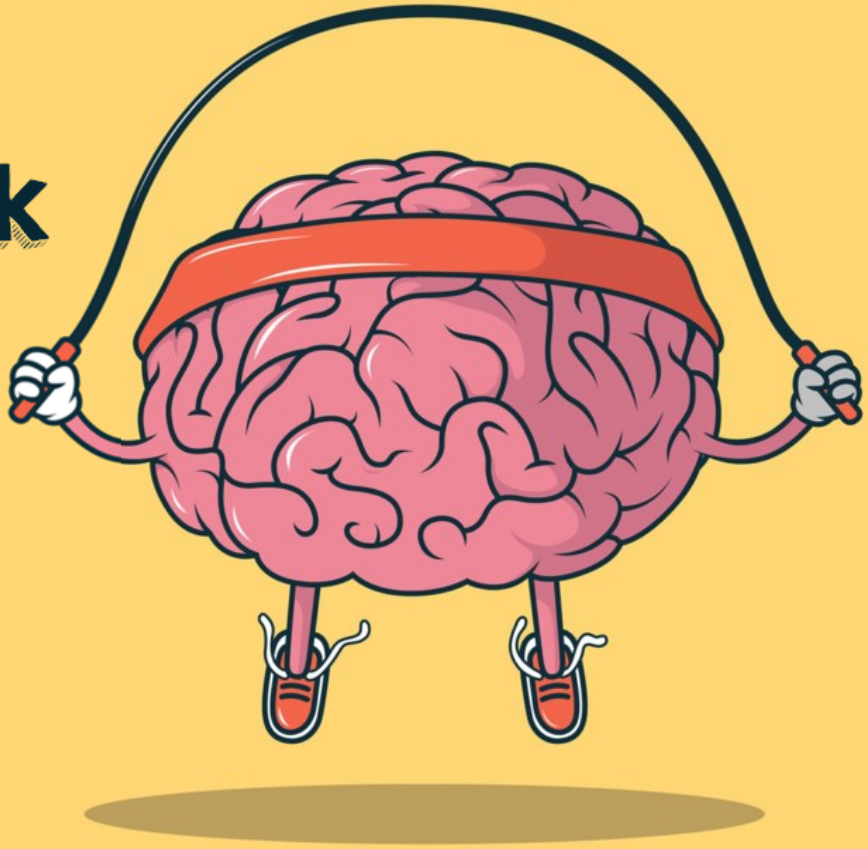
This week we are learning to...



Project

For the next part of this term the Hedgehogs' class will be learning about 'Pets'. We will begin our new project looking at all the different pets and how we care for them and all the things they might need. If you have any pets at home we would love to display some pictures in our classroom of them. If you would like to add a picture of your pet to our pet display please send a picture to info@mulberryhouseschool.com.

Literacy

Our story this week will be 'The Dot' by Peter H. Reynolds. The children will be encouraged to make their own art work looking at a repetition of circles and dots. At home, you can support your child's fine motor skills by allowing your child to freely mark make on paper, creating big marks and small marks. Focus on your child's dominant hand, you will be able to identify this by either looking at the strength of their grip or the hand which they choose to use.

Understanding The World

This week the Hedgehogs' class will be chefs! The children will be supported in following a simple set of instructions and even two part instructions. At home, you could allow your child to help you prepare their breakfast and snacks to encourage and support their independence.
