This week we are learning to...

Maths

This week, the Squirrels' class will be learning about preposition. They will be doing this with everyday objects. For example, "Can you put your water on top of the yellow tray?" The children will be practising 'on top', 'next to', 'in front' and 'behind'. At home, you could use a teddy and ask your child to place the teddy in and around different parts of a sofa or chair.

Literacy

This week, the Squirrels' class will be drawing the birds we can see when we are outside. The children will be using mark making tools to create their drawings. The children will be describing the birds they see using key vocabulary such as 'beak', 'wings' and 'feet'. At home, you can support your child by practising their tripod grip and encouraging them to create observational drawings of items in your house or garden.

Project

This week in our 'People who help us' project, the children will be exploring what a dentist does and some of the equipment that they use. This topic will begin with discussions and activities about what a dentist does and even if we have any past experience. At home, you could encourage your child to check their teeth in the mirror. Are they nice and clean? How can we clean our teeth? What should we put on the toothbrush? This is a great opportunity to develop independent skills when learning how to brush our teeth. It is a great idea to discuss what foods are good
