This week we are learning to...

Maths

This week, the Squirrels class will be recapping how to count out objects from 0-3 using one to one correspondence. At home, you could practise with your child by counting objects in your environment. To count and understand the value of 0, present your child with an empty container. Remind your child that 0 has no value and therefore has no objects inside. If your child can count from 0-3, you could then extend this to 5 or beyond

Literacy

This week, the Squirrels' class will be drawing our favourite fruit. The children will be using colour pencils and crayons to create their drawings. The children will be describing the fruit of their choice too. At home, you could support your child by practising their tripod grip and encouraging them to create observational drawing of fruit in the house.

Project

This week in our 'People who help us' project, the children will be discussing and roleplaying their experiences with the post office. At school, we will be creating parcels and letters and roleplaying what people in postal delivery jobs do. At home, your child could create a postcard or picture to send to a loved one.
