**This week  
we are  
learning  
to...**

#### Project

As we begin this term, we are introducing the Hedgehogs' class to our new project on 'Transport'. We will be looking for children to show confidence and independence in using resources, as well as acknowledging the other children around them. We will be exploring all the different modes of transport from around the world, looking at the different ways they move. To support this, you could discuss the different modes of transport you see on your way to and from school.

#### Literacy

The Hedgehogs' class will be introduced to some new and recognisable stories this week as we familiarise the children with routine and expectations, as well as getting used to sitting together with their peers. The story of the week will be 'Superworm', by Julia Donaldson. We will be exploring the use of songs alongside the stories to encourage repetition and use of rhyme, building on their communication and language. You can encourage this at home by using some of the songs we use at school, such as "How are you today?" using Makaton signs!

#### Personal, Social and Emotional Development

Every Friday, the children are encouraged to bring something personal to them from home to share with their peers at school. This is to support their personal development, as well as their communication and language. At home, you can support your child in choosing a topic to talk about and prompt them with some questions about this. We hope to see progress in the children's communication and language abilities as we go through the term.
