**This week
we are
learning
to...**

Maths

This week, the Squirrels' class will be counting objects from 0-3. At home, you could practice with the children, by counting objects in your environment. To count and understand the value of 0, present the children with an empty container, remind the children that 0 has no value and therefore has no objects inside.

Literacy

This week, the Squirrels' class will be using playdough to develop their fine motor skills. At home, you can fill different balloons with flour, rice and lentils. Tie up the end and ask the children to move the sensory balloon in a variety of ways. For example, roll, squeeze, poke, pull and flatten.

Project

This week, we will be introducing the children to our 'All About Me' project. The children will be discussing the people that they live with and observing their similarities and differences. At home, the children could use coloured pencils to create a portrait of a family member.
