**This week
we are
learning
to...**

Maths

This week, the Squirrels' class will be learning the difference between Heavy and Light. At home, you can support your child by providing them with a few heavy and light toys or objects. Encouraging them to then separate the toys into the two categories of heavy and light.

Literacy

This week, the Squirrels' class will be focusing on their fine motor skills through mark making. The children will be using feathers to make different marks. At home, you could provide your child with some paint and a variety natural tools, to dip in to the paint and mark with on paper. Some great natural tools are sticks, flowers with a stem and thick long leaves.

Project

This week, in our 'People Who Help Us' project, the children will be exploring what a doctor does and some of the equipment that they use to help us. This topic will begin with discussions and the profession and past experience. At home, ask the children why they think we go to the doctors and maybe create your own Teddy's clinic for unwell bears.
