**This week  
we are  
learning  
to...**

### Maths

This week, the Squirrels' class will be counting out objects from 0-3. At home, you could practise with your child, by counting objects in the environment. To count and understand the value of 0, present your child with an empty container, remind them that 0 has no value and therefore, has no objects inside.

### Literacy

This week, the Squirrels' class will be doing observational drawings of their favourite fruits. The children will be practising how to hold the pencil with a tripod grip to draw these patterns. At home, you could encourage your child to make circular marks. Try to make the circles clockwise and anti-clockwise.

### Project

This week, in our 'All About Me' project, the Squirrels' class will be continuing to learn about their 5 senses. We will be focusing on our sense of smell, and the children will be taking part in a blind smell test. You can try this at home too. Remember to encourage your child to use their nose to guess the smell.
