**This week
we are
learning
to...**

Understanding the World

The Hedgehogs' class are going to be recapping the different pets that they have been learning about. The children have been identifying the different features of different animals and how to care for them. At home, you could create a vets, where the children can practise looking after their stuffed animals.

Maths

This week, the Hedgehogs' class will be recapping all of the shapes we have learnt this term. At home, the children can practise looking for shapes inside and outside their home, finding and identifying them. Next, ask the children to identify the shape's properties, such as how many sides and how many corners that they have.

Literacy

This week, the children will be exploring trains. The children will be discussing previous experiences and where they have travelled. The children will be learning about the different parts. The children will be drawing the wheels on a large drawn train, practising their clockwise and anticlockwise markings. At home, you can ask the children to draw their own wheels or circles, using clockwise and anticlockwise movements.
